

Federal Highway Administration's

NextGen NHTS Pooled Fund Program Open House

The Federal Highway Administration is establishing a new pooled fund program in support of the next generation National Household Travel Survey (NHTS). NextGen NHTS will integrate passive data with household travel surveys to provide both long-distance and local travel behavior data on an annual basis. We invite you to come and learn more about this new pooled fund effort while at TRB.

Whether you just completed a household travel survey or are heavily researching your 2020 survey program, this pooled fund program will equip your agency with the research and results needed to meet local and long distance travel behavior needs on an annual basis. We hope to see you there!

Details
