Deadline
November 15, 2018

CONTACTS

Technical Program:
Haneen Khreis
h-khreis@tti.tamu.edu

Registration:
Mary Cearley
m-cearley@tti.tamu.edu

We welcome students, researchers and faculty, and practitioners from the public and private sectors.

We also invite you to submit abstracts for the lectern and poster sessions.

REGISTER NOW

Omni Austin Hotel at Southpark • Austin, Texas

KEYNOTE SPEAKERS

Daniel S. Greenbaum
President
Health Effects Institute

Neil Pedersen
Executive Director
Transportation Research Board

MODERATOR

Katie Turnbull
Executive Associate Director
Texas A&M Transportation Institute

JOIN US for a one-of-a-kind symposium on transportation, air quality, and health. We will discuss research, policy, and emerging issues in transportation emissions, energy, air quality, exposures, and health. This is a unique interdisciplinary event, bringing together experts from both the transportation and health worlds.

Keynote speakers will be Daniel S. Greenbaum from the Health Effects Institute and Neil Pedersen from the Transportation Research Board, leaders in the fields of health and transportation.

The keynote session, moderated by Katie Turnbull, will feature each speaker's unique perspective — one on producing trusted science for cleaner air and improved health worldwide, and the other on direction and leadership of the world's largest transportation research and practice community. The speakers will discuss research pathways for addressing the emerging area of health and transportation. These insights will set the stage for a fruitful symposium and help us work across the disciplines to make a global impact.
